

Soviet 2nd Substitute Pennant of the International Nautical Code, dated 1952.

In wool bunting, same quality and construction as the typical Soviet Navy ensign and other naval flags of the period. Measures approx. 36" x 23". Comes with a long attachment rope in natural hemp (as opposed to synthetic thread as seen on later Soviet flags), complete with metal hardware to hoist on the line. The hoist sleeve shows markings of the Nabivtkan Factory, quality control stamp, and a 1952 date of manufacture.

The flag is in very good to excellent condition. It is free of any moth damage. There are a few small spots to the grey field on one side that are not very detractive and may clean off. There is no significant staining or soiling. The flag is completely sound, and the colors are bright, not showing any fading.
