

## Badges of Russia, Volume II, S Patrikeev & A Boynovich, Moscow, 1998, English and Russian text.

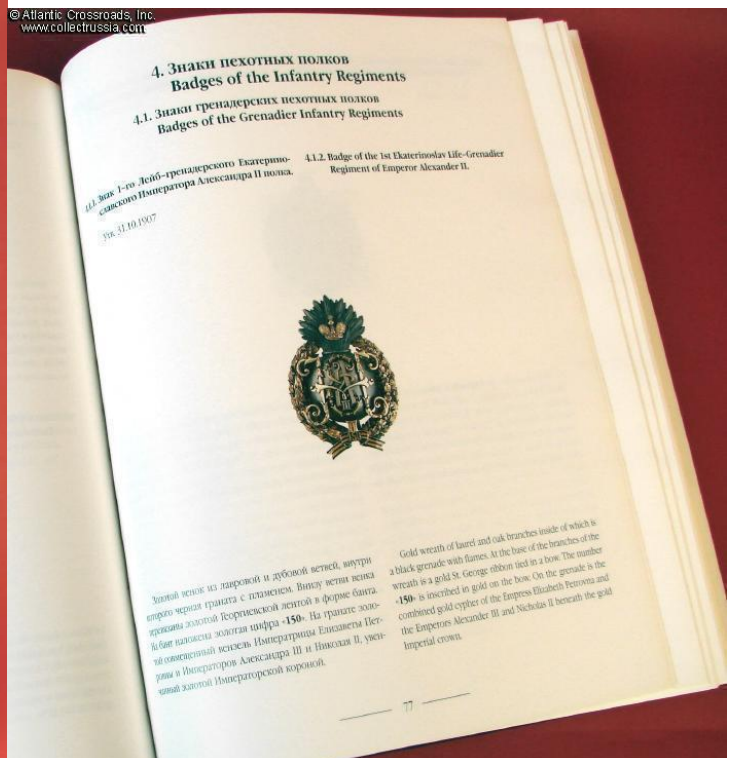

Hardcover with dust jacket, 504 pages. 11" x 8.5" x 1" thick.

This stunning work, the most complete of its kind, documents badges of Imperial Army Regiments previously unknown to collectors. A handbook for both the badge collector and the historian of Imperial units and regiments.

Appalled by the incomplete state of knowledge on this fascinating subject, the authors set about documenting these badges to the fullest extent possible. They photographed and fully documented hundreds of specimens found in museums and private collections worldwide. Where original examples could not be found, the authors commissioned accurate color illustrations to take their place. The results of their meticulous and time consuming research are presented here in color. Highly recommended and truly a book to be cherished.
