

Fedoskino, Nikolai Malakhov, C 1990, Moscow, Izobraitlenoye Iskusstvo Publishing House.

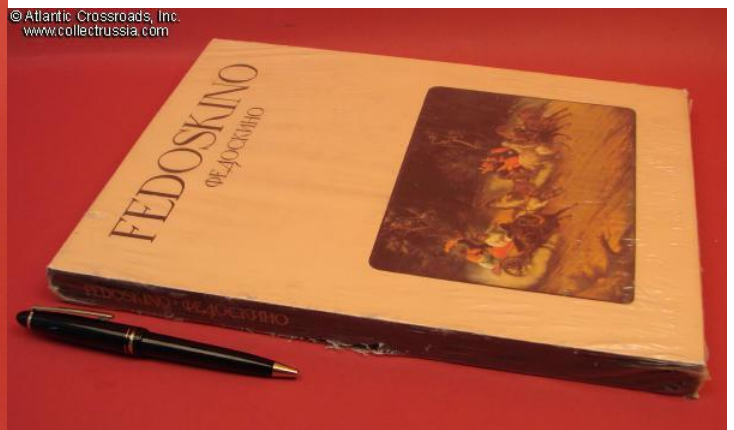

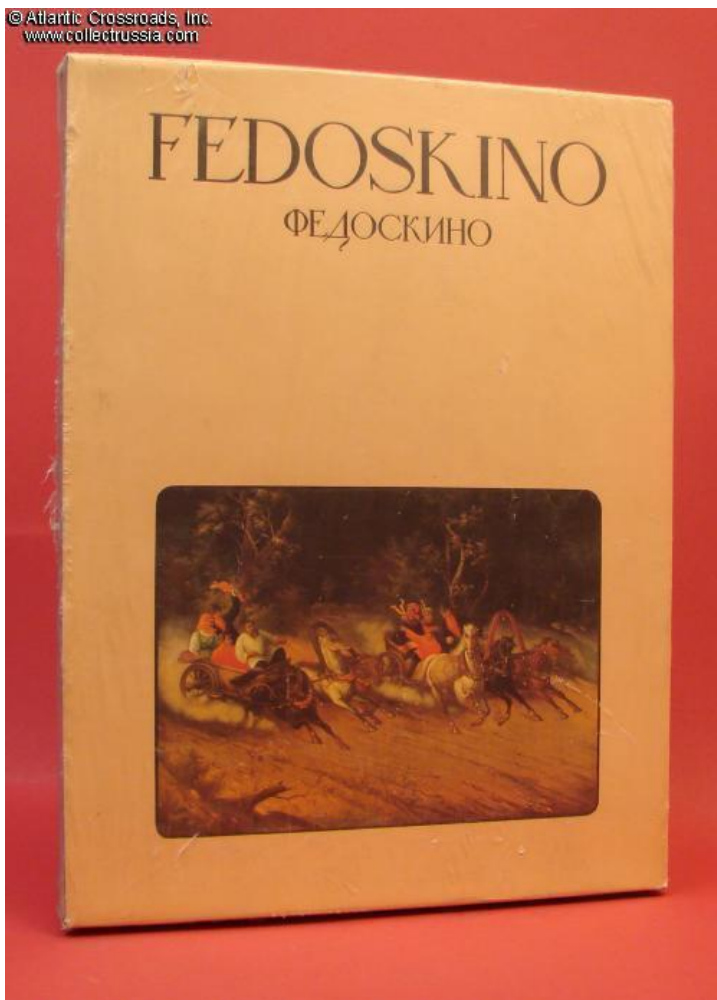

In Russian and English (fully translated), hard cover with slip case, 164 pp, over 170 high quality color photographs. Fine quality catalog of the best works by Fedoskino artists starting from the early XIX Century through the late Soviet period. The book contains very interesting historical overview of the art of Russian lacquer miniature in general and the unique Fedoskino school in particular. The handy index in the end provides important details of each individual work presented in the catalog.

The slip case shows shelf wear but the book itself is in near mint, unused condition. This scarce and beautiful book can be a real treat for the dedicated collector of papier-mâché lacquer boxes or anyone interested in traditional Russian art.

Please note: we have a SINGLE copy of this book in stock which is still shrink-wrapped and has slip cover in much better condition than the one shown in our photo. If you order, we will send you this shrink-wrapped copy.

Item# 26242

**\$65.00**
