

Order of the Patriotic War, 2nd class, Type 1 (on suspension), expertly made REPRODUCTION.

In base metal and "cold" enamel; medallion is 44 mm wide. Precisely like the original including the back plate and hexagon nut of the suspension and the three-piece construction of the pendant. The enamel and finishes are a close match without attempting to pass for the real thing. The reverse has engraved serial number (it may differ from the example in our photo). An excellent copy to fill the display case or use on an early WW2 uniform.
