

Pyongyang-Nampo Highway Construction Commemoration Medal, Variation 2.

Medallion is in anodized aluminum, 41.1 mm tall (incl. eyelet), 35.0 mm wide. Features highly vaulted construction and pebbled background on both sides. In excellent condition. The finish is nicely preserved showing only minimal wear at the highest points of the artwork. Comes on original brass suspension with well-preserved old ribbon.

The medal was established in September 2000. Apparently relatively few were awarded, and it remains among the harder to find North Korean medals (rated R2 for rarity by Sessler and McDaniel.) / Sessler & McDaniel [Military and Civil Awards of the Democratic People's Republic of Korea \(DPRK\)](#), pp. 387, 388/.
