

Mongolia, Order of Maternal Glory, 1st class, Variation 2, #46750.

Gilded brass, enamels; 46.6 mm x 39.2 mm. The badge is two- piece construction: the mother holding a child is a separate, superimposed part. Variation with rotating tool engraved serial number.

Very fine condition. The enamel is free of the usual penetrating chips or repairs; there is only a single hairline on the banner as well as minor flakes and contact marks. The green enamel on the leaves near the bottom of the badge is completely intact, and so are the azure enamel in the center and the white enamel on the numeral plaque. The enamel everywhere shows very nice luster. Some of the original fire gilt finish on the wreath is still clearly visible in recessed areas. The screw post is original and of full length, over 11 mm, and comes with original maker-marked screw plate.

Item# 37204
