

Motherhood Medal 1st class, circa 1970s-1980s issue.

Medallion is in solid silver, measures 29.2 mm wide; weighs 17.4 g without suspension and connecting link, 25.0 g overall. The suspension device is in gilded brass and enamels.

In outstanding, excellent condition. The medallion is nearly pristine, has only a couple of miniscule dings to the raised edge on the reverse that are almost unnoticeable to the naked eye and a few microscopic contact marks that are completely invisible without a 10x loupe. The raised details of the artwork and lettering are perfect and extremely crisp. The enamel on the suspension is likewise essentially perfect, has only a few miniscule flakes at the edges and microscopic contact marks, none of which is easy to find even under magnification. The gilt finish on the suspension is nice and bright. Overall, an outstanding example.
